You Know The Ink!

Through the same tested methods of manufacturing, selling and advertising, The Carter's Ink Company is making Carter Fountain Pens, Mechanical Pencils and Desk Stands as widely and favorably known.

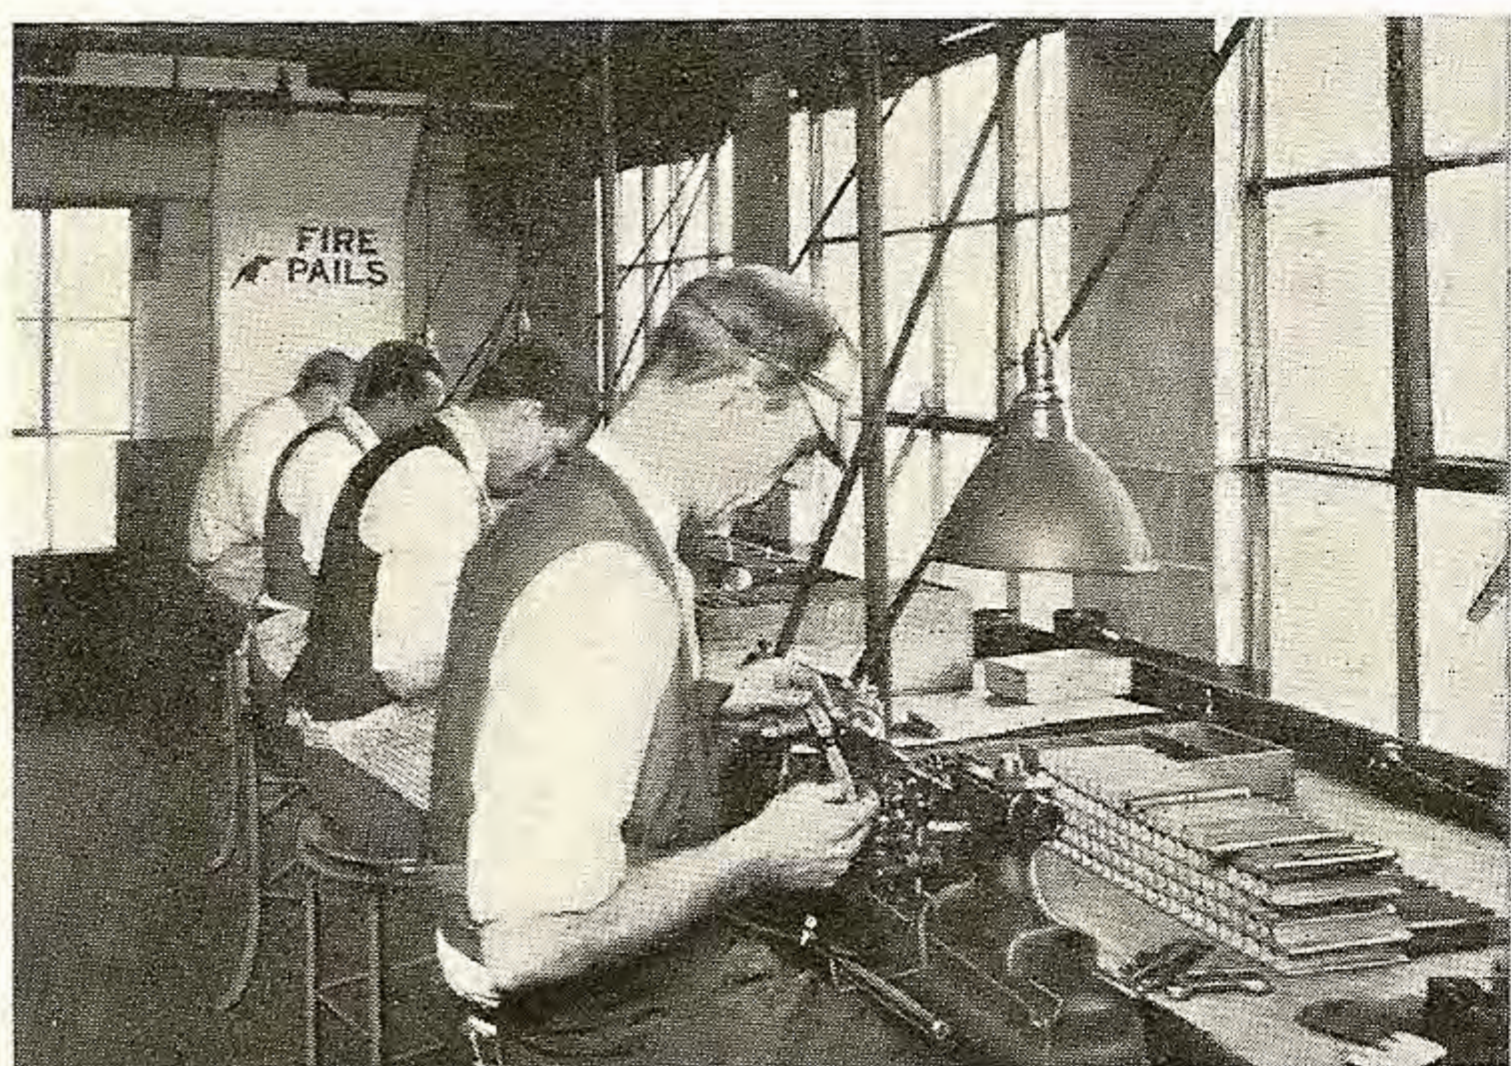

A PARTIAL VIEW OF THE FOUNTAIN PEN AND PENCIL MANUFACTURING DEPARTMENT SHOWING A NUMBER OF THE MACHINES NECESSARY TO TURN OUT THESE PRECISION-MADE WRITING INSTRUMENTS.

The Carter Line offers your customers what they most desire—quality and long service with beauty—all the requisites for your success in building a profitable business on Carter's Fountain Pens and Mechanical Pencils.

Writing Smoothness

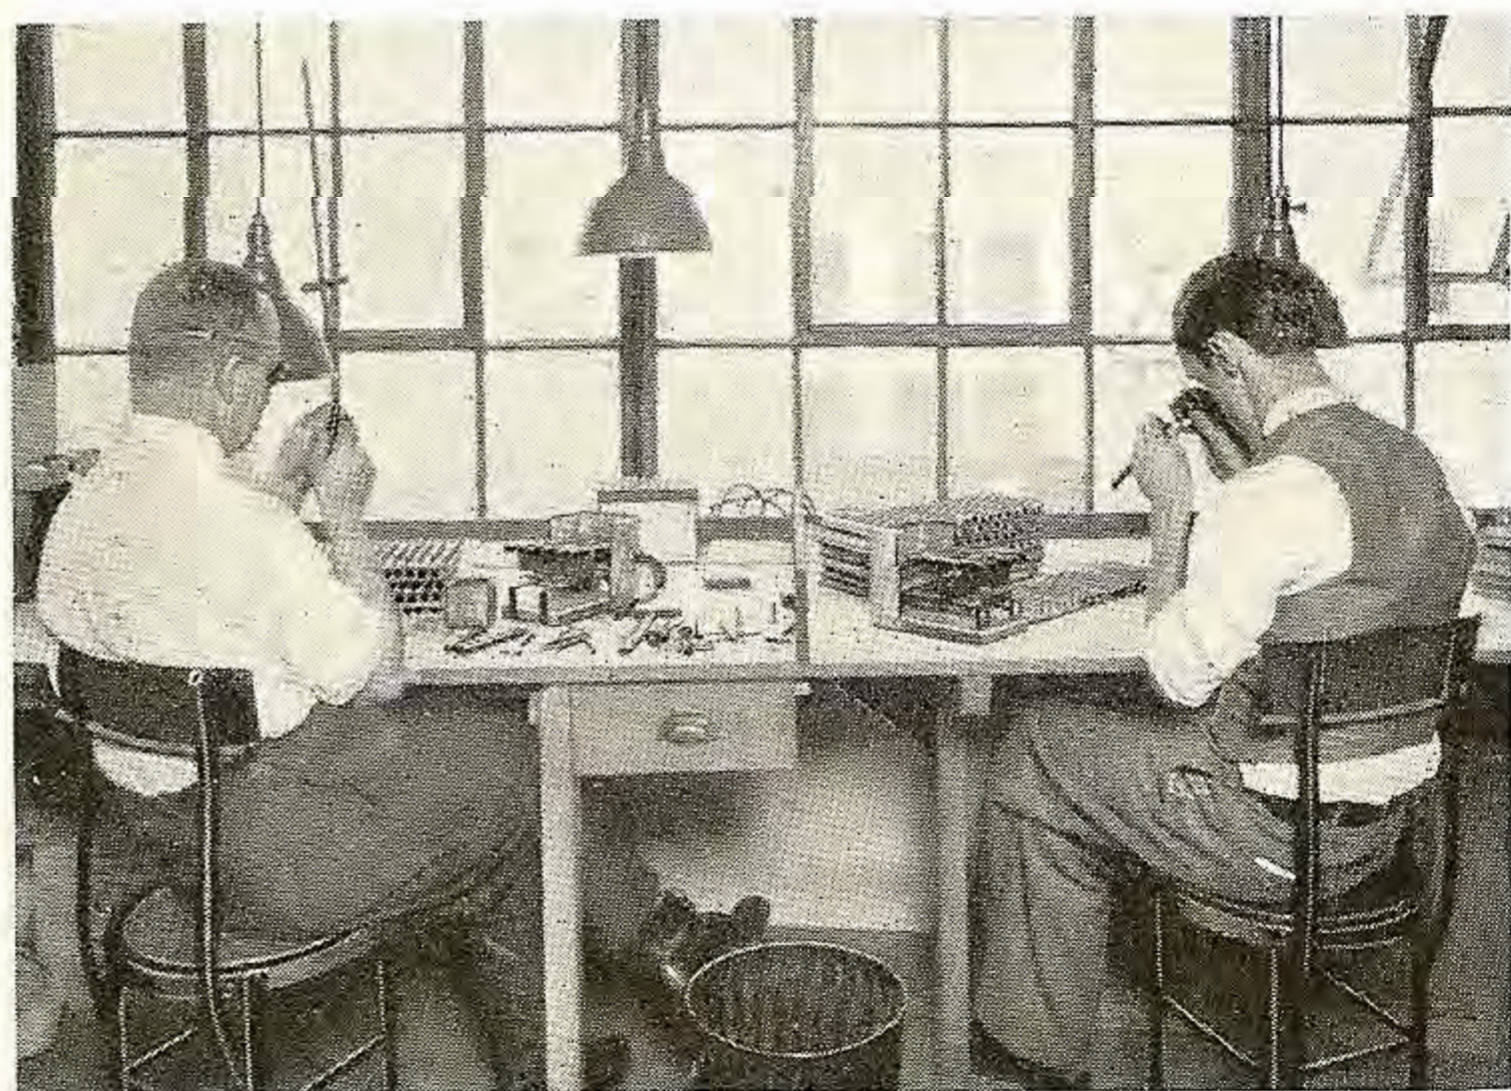

Long Life

Attractive Appearance

FINISHING DEPARTMENT

In order that a fountain pen may give perfect satisfaction—carried without leaking and used without flooding or stalling—it is necessary that the cap and barrel fit exactly. These skilled workmen through long experience and by the use of special precision gauges insure this. The threads on the pen section and the corresponding grooves on the cap, the meeting surface and the seating for the nib demand minute accuracy.

PEN SETTING

The proof of the pen is in the writing point. These experts see to it that the gold nib and the comb feed are so combined in the pen barrel and so perfectly adjusted to each other that there is a smooth velvety flow of ink from the nib the minute it touches the paper, and that this flow stops the instant the hand is lifted.

ARE WHAT THE CONSUMER DEMANDS AS ESSENTIAL QUALITIES IN A WRITING INSTRUMENT.

These are the high spots that The Carter's Ink Company offers in their complete line of Fountain Pens, Mechanical Pencils, and Desk Stands.

IF YOU SELL THE CARTER LINE HERE ARE SOME OF ITS ADVANTAGES:—

The best merchandise that skill and money can produce.

Selling features such as—

The smooth-writing Osmiridium Point that makes writing a pleasure.

The Carter Rocker Spring Clip that protects the pocket against wear and the pen against loss.

A special guarantee on all Carter Pens selling at \$5.00 or more—a general guarantee on others priced at \$3.50 or less.

A short line, yet complete enough to satisfy every type of pen user.

Carter Desk Stands with bases of marble, onyx and metal mounted with single or double pens.

The Carter Mechanical Pencil—precision built with a smooth propel-repel-expel action.

Practical and attractive accessories such as Traveler's Cases and special Gift Boxes.

Plenty of Assistance in Selling The Carter Pen

SOME OF THE SELLING HELPS FOR THE CARTER LINE INCLUDE:—

Color pages in *Collier's* and black and white pages in the *Saturday Evening Post* at the important selling seasons during the year.

Window and Counter Signs; Window Displays; and printed matter with your name and address.

Special set boxes without charge on all pens and pencils sold as sets; trays for your show cases; counter and floor cases on liberal terms.

Details of our coöperation are explained in the pages that follow.

As our success and yours in the pen business depends upon giving the consumer what is wanted, we will appreciate at all times your comments, suggestions and criticisms of the Carter line.

SMOOTHING PEN POINTS

The Carter Osmiridium Point must be velvety smooth to the writer's touch before it is passed to the Inspection Department and it must pass here a final minute inspection before being placed in stock for your use.

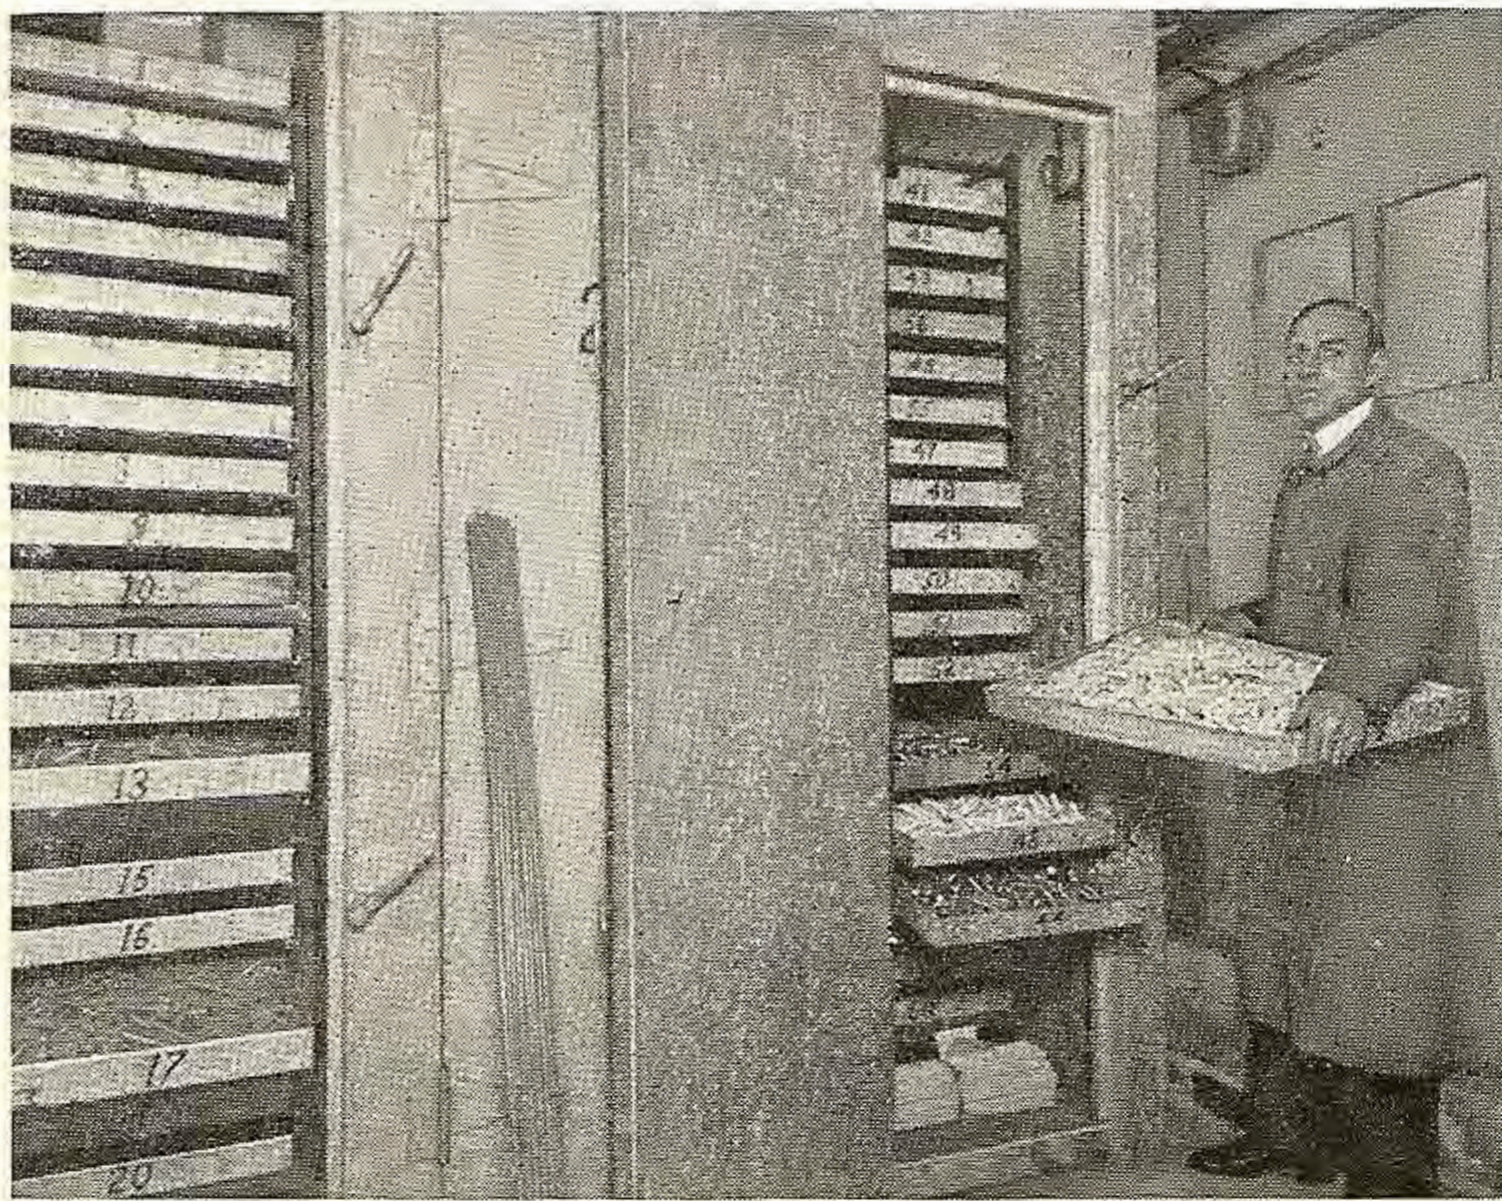

FINAL INSPECTION

A section of our Inspection Department where completed pens are tested for the action of the filler device, filled with ink, given a writing test, and passed on to the final inspector to be cleaned again and sent to the Packing Department.

A Liberal Guarantee On All Carter Pens

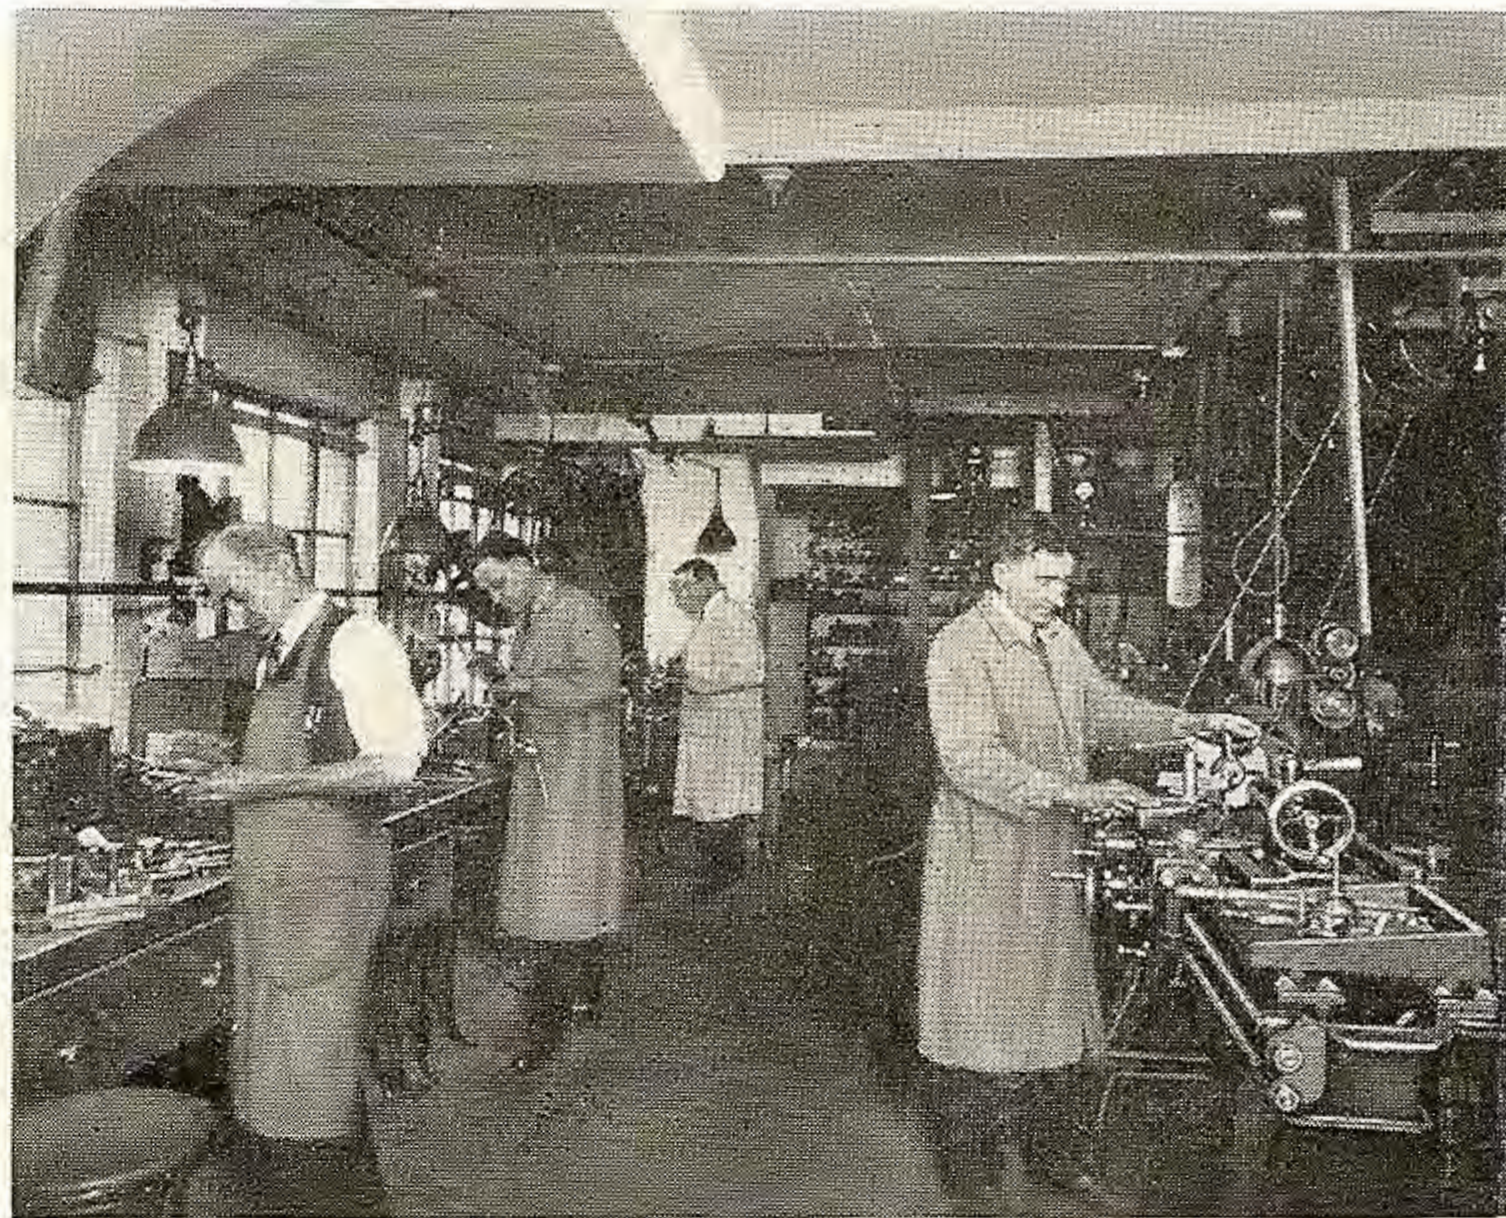

All Carter Pens selling at \$5.00 or more with Flexible or Stiff nibs are unconditionally guaranteed. Pens selling at \$3.50 or less carry a general guarantee. (See exact wording of both guarantees on color pages.)

SEASONING VAULTS

The Carter's Ink Company uses the new unbreakable materials in making pens and pencils which makes seasoning necessary. The vaults shown contain raw stock both in rod form and cut rough shapes, together with partly finished caps and barrels, which are returned to this process several times during manufacture. Through regulated temperature, the material is properly seasoned so that when the pen is completed there will be no danger of its shrinking or changing

TOOL AND GAUGE DEPARTMENT

shape. Bear in mind that this seasoning is in addition to what the manufacturer has already given the material before it is shipped to us.

In the Tool Department, a force of men is kept constantly at work making new tools and gauges so that Carter Pens and Pencils may maintain their reputation as precision-made writing instruments.

And Now It's Carter's Pearltex Pens

For beauty and craftsmanship there is nothing that approaches the latest Carter offering—*Pearltex*. For years the public has called for a Mother-of-Pearl Pen similar to the "class" pen of preceding generations—until Carter perfected *Pearltex*—real Mother-of-Pearl—all efforts to make such a pen were of no avail.

Now Carter's *Pearltex*, made by a patented and exclusive process, is found in four rich lustrous colors, each with a sheen that is without a rival.

PENS ADJUSTED TO ANY ANGLE!

A special swivel joint fastens the pen
socket to the base and permits the pen
to be adjusted to any desired position.
The swivel action is entirely free with-
out fixed positions—something exclu-
sive in Carter Desk Stand construction.

PENS LIE FLAT FOR SAFETY!

This is a two-fold talking point—first,
it permits the stand being put away
and locked up, and second, allows the
pen to be placed in this position when
not in use, lessening the chance of in-
jury when a roll-top desk cover is low-
ered or when someone brushes against
the stand while it is on the desk.

HELPFUL INFORMATION Regarding Carter Floor Cases

Examine on arrival for concealed Loss and Damage. It is best to open one side of packing case and carefully examine floor case for damage before removing from packing entirely. If damage is evident notify **immediately** (do not delay) the Transportation Company to send agent to examine.

Be sure Case is Level. It is important that the larger Floor Cases be level so that the doors will open freely and the plate glass will not be under severe stress and strain. All cases are tested at factory on perfectly level bed. Case should be tested when set up and levelled if floor is uneven.

Carter's FOUNTAIN PEN Inks

CARTER'S BLU-REX

FOR FOUNTAIN PENS AND STEEL PENS

BLU-REX writes a rich blue that remains ever blue. Blu-Rex is not permanent and therefore is easily removed by soap and water from clothing and rugs. It is an ideal ink for hotels, schools and colleges, clubs and equally good for fountain or steel pens. Blu-Rex flows smoothly and evenly without blot or blob from the fountain pen.

CARTER'S RYTO INK

FOR FOUNTAIN PENS AND STEEL PENS

THE leading ink for fountain pens and general use, made from an entirely new formula developed in the Carter laboratories. Ryto writes a vivid blue that is very easy on the eyes under natural or artificial light. It is an iron gall ink which becomes a permanent black after oxidizing. Ryto has met with wide favor because of its beautiful color, freedom from sediment and the fact that it retains its snappy color in the bottle when in use.

CARTER'S FOUNTAIN PEN INK

ABLUE-BLACK, free flowing, fine writing ink. Its initial color is a delightful, easy-to-read blue, deep and full, that later turns to a permanent jet black. It is made to prevent clogging in the pen and is of a consistency to flow from the pen at the slightest touch but not freely enough to drop.
